

AXIS P85 Network Camera Series

Discreet, eye-level cameras for identification

AXIS P85 Series offers eye-level, pinhole cameras installed in a height strip housing for discreet, indoor video surveillance—ideal for retail, hotel and banking environments. For placement near exits of buildings, AXIS P85 cameras are positioned to look straight at a person's face for more reliable identification even when the person is wearing a hood or baseball cap.

The series comprises AXIS P8524 and AXIS P8535. AXIS P8524 provides HDTV 720p and a 57° horizontal field of view. The advanced AXIS P8535 offers HDTV 1080p, a wide 92° horizontal field of view and Wide Dynamic Range – Forensic Capture that enables superb performance in scenes with high-contrast lighting and low light.

AXIS P85 cameras have a rectangular form factor in black or silver with a height indicator in metric or imperial measurement. The sensor unit (lens and image

sensor) is mounted at a height of 170 cm in the metric model and 5.5 ft in the imperial version. The sensor unit has a cable for connection to the main unit, which can be placed out of public view.

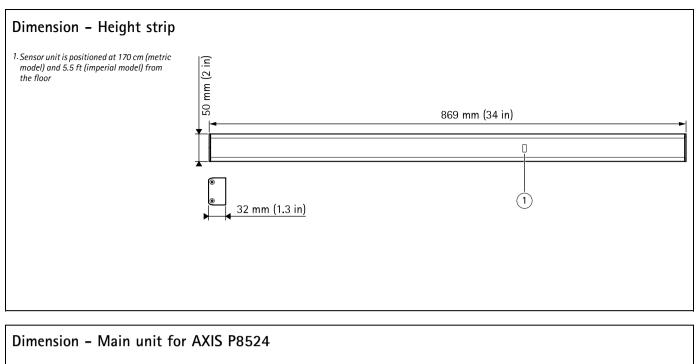

AXIS P85 cameras support Power over Ethernet, and their viewing direction is easily adjustable. They enable local storage of recordings and connection to external devices. AXIS P8535 also supports audio and RS232 for integration of external data to the video.
